● **Meiji Park (A course)**

Meiji Park is at the center of the Nemuro Peninsula. This park was built on the second oldest ranch park in Hokkaido (1875), and three brick silos were built during the 1930's symbolizing the flourishing agriculture industry in the Nemuro area.

● **Cape Nossapu (A course)**

Cape Nossapu, one of the most famous landmarks in Hokkaido, is the easternmost accessible point of Japan and presents the oldest lighthouse of the prefecture (1872). On a clear day, visitors can observe the Northern Territories, the four Kuril Islands, such as Habomai island and Kunashiri Island.

● **Wheel Stone (B course)**

Hanasaki headlands overlook this well-known monument of the Nemuro area. Directly beneath the Hanasaki Lighthouse, made from natural erosion of basalt stones, this huge car wheel-shaped rock formation can be admired. Over 6 meters in diameter, this is a rare natural monument of Japan.

● **Road side station Swan44 <Lake Furen> (B course)**

Lake Furen is located at the base of the Nemuro Peninsula, where sea water and spring water blend. Surrounded by the vast forest and appreciated for its varied environment and beautiful nature. Lake Furen is also the home of Japan's largest swan habitat as well as more than 330 bird species, therefore a great, nationally renowned location for bird watching.
